TenaTac®

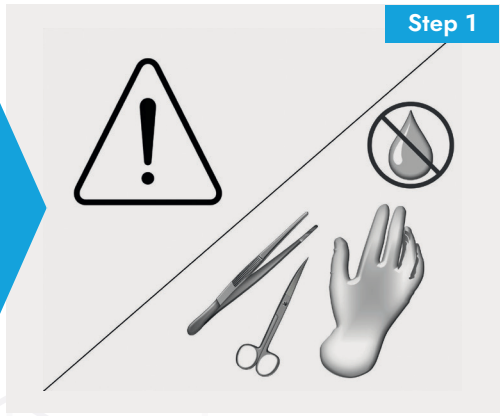
Instructions for correct application
Open surgery

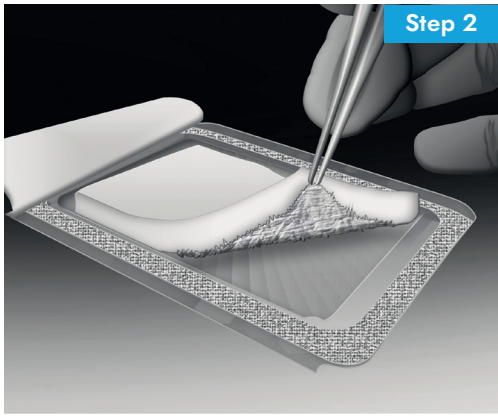
FRM751-116
Rev. 00 2025-07

General steps

Step 1: Ensure that gloves and instruments are clean and dry

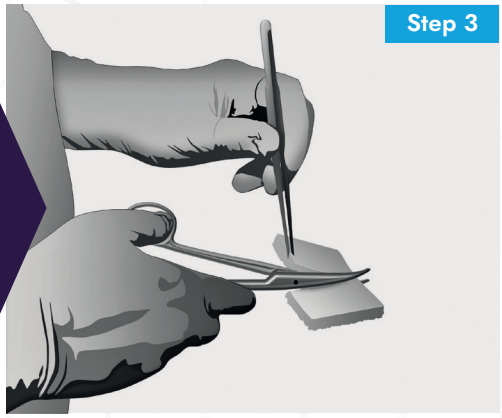
Step 2: Take TenaTac® from the packaging using sterile technique

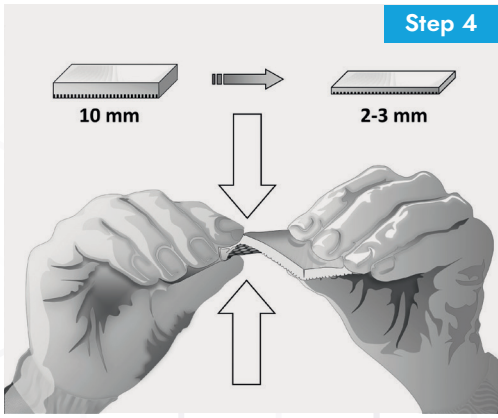




Step 3: Cut TenaTac® to size if required

Step 4: If needed, compress TenaTac® to enhance flexibility for easier application





Step 5: Apply TenaTac® (columns on tissue) for 30-60 seconds to initiate adhesion whilst compressing with a moist cotton gauze

Step 6: Continue to apply light pressure for 2-3 minutes. For extra flexibility or elasticity additional moistening with gauze is advised
